Overview

Aurora DT85V Heavy Duty Desktop Calculator with Large Display and Keys 12-Digit

The Aurora DT85V is built for durability and reliability and is a great calculator for heavy duty applications, the 12 digit LCD display features large digits and is angled to enable easy viewing.

The calculator is designed for ease of use with large keys, large numerals, extra large commonly used keys and the unique elongated equals bar that all support fast data entry.

Special features include the unique dual memory system, where two sets of memory keys operate two independent memory functions.

Overall a reliable heavy duty product with a large display and durable keyboard that is suitable for high use situations.

- Large 12 digit display
- Heavy duty durable key pad
- Patented long equals bar
- Extra large commonly used keys
- 2 independent memories
