Overview

Igenix IG9703 (6 Litre) 3-Speed Evaporative Air Cooler (White) with LED Display PIK03220

Stay cool and comfortable this summer with the Igenix IG9703 Evaporative Air Cooler.

It has a powerful air cooler, humidifier and air cleaner that does not require venting or installation and is ideal for well ventilated small to medium rooms or as personal cooler.

This air cooler cools the air by means of evaporation.

When cool water evaporates into the air, the result is a mixture of cold air and mist.

This slim and stylish, portable model is ideal for creating a comfortable cold air breeze through your home or office.

This model features a 6 litre water tank, 3 speed fan settings, castor wheels for easy manoeuvrability, water gauge so you can see the amount of water left in the tank at any time, 7 hour timer and an Ice chamber for improved cooling.

Another useful function is the oscillation key, which tilts the louvers up and down for better air distribution.

It also comes with a remote control for added convenience.

Air Coolers can be used as an alternative to traditional air conditioning units, in comparison Air coolers are more environmentally friendly as no refrigerates are used, they are more cost effective plus they can humidify and clean the air as it cools.

- 7 Hours Timer Setting and 3 Wind Mode
- Humidification Function
- Oscillation Function
- 6 Litre Removable Water Tank
- Closed Front Grilling, Prevent the Dust and Impurities Getting Inside

- Big Carry Handle with Remote Control
