Overview

Verbatim DVD-RAM 4.7GB Branded Jewel Case 5 Pack

DVD-RAM is a rewritable media that uses phase change technology for recording.

Two generations of DVD-RAM are available: 2.6GB/5.2GB and 4.7GB/9.4GB.

DVD-RAM is designed for data intensive, high performance applications.

Data stored on DVD-RAM can be accessed in the same manner as a hard drive, with drag and drop capabilities, and can be overwritten 100,000 times.

Double sided discs are available either in a Type 1 (non removable) cartridge (5.2GB capacity) or Type 4 (removable) cartridge (9.4GB capacity).

Single sided discs are available bare, or with a Type 2 (disc removable) cartridge for reading in later generation DVD readers, DVD-Video players and DVD recorders.

- High capacity; up to 9.4GB
- Fast random accessibility
- Superior error correction defect management
- 100,000 overwrites
- Available in Jewel Case or Video Tall box (Video Tall Box available soon)
- Removable and non-removable cartridge and bare disc configurations
- Lifetime Warranty
