Overview

Econ Multimedia Headset/Mic 24-1531

Want a set of headphones that are high quality, with outstanding sound clarity, and all for a great price? ...

well here you have them! The HP531 MOBILE headphones! Enjoy your music at home, work or when travelling from your favourite audio devices! Compatible with music players, mobile phones & tablet PC's for all round functionality.

Over-head style headphones with adjustable, padded headband and faux leather, soft and luxuriously padded ear cushions give users total comfort all day, every day!

- Easy to use built-in remote: Featuring essential functions including: Pause, skip to next song, activate voice control, answer & end incoming calls
- Right angled connector lies flat against your device rather than protruding upwards for added comfort when carrying in your pocket. Also prevents damage to the connector, accidental removal & provides less stress on the cable
- Acoustic technology creates more depth & clarity to your music resulting in a high performance sound experience
- Around ear cushioned pads side steps most of the comfort issues of 'on-ear' earpads as the padding rests on the less sensitive area of your ears rather than directly on them ensuring a long lasting comfortable fit
- The padded headband can be adjusted by approximately 35mm each side creating a perfect fit for all
