Overview

Apple iPad Mini 4 (7.9 inch Multi-Touch) Tablet PC 128GB WiFi + Cellular Bluetooth Camera Retina Display iOS 9.0 Apple SIM (Space Grey) APP37690

iPad mini 4 is so thin it can fit into just about any carry-on, clutch or daypack.

It's the perfect size for everything from entertaining the kids on a long plane ride home to identifying constellations from your campsite.

iPad mini 4 has never been more convenient or more portable.

And even though it's only 6.1 mm thin, it doesn't sacrifice strength.

The durable aluminium unibody offers seamless beauty that will last for years.

The displays on previous generations of iPad mini were constructed with three separate components.

With iPad mini 4, we combined those three layers into one.

This eliminates gaps between layers, along with the internal reflectance caused by those gaps.

The result? The iPad mini 4 display delivers even more lifelike colors, greater contrast, and sharper, more vivid images.

The LCD layer is now closer than ever to your eyes (and your fingers), so when you touch the screen it truly feels as if you're touching your content.

We've also improved the sensitivity of the screen, so it tracks your finger even more accurately, especially when you make quick gestures.

Which means everything you do - playing games, surfing the web, enjoying photos and videos - feels more natural, immediate, and immersive.

iPad mini 4 features a custom-designed anti-reflective coating that reduces glare by 56 percent compared with previous iPad displays.

In virtually any kind of environment - offices, classrooms, the outdoors - everything is clearer and more readable.

Something that performs this beautifully deserves an equally beautiful finish.

iPad mini 4 comes in silver, space gray, and gold.

So it's sure to stand out no matter where you take it.

- 128GB Storage
- 7.9 inch (diagonal) LED-backlit Multi-Touch Retina display
- 2048-by-1536 resolution at 326 pixels per inch (ppi)
- Fingerprint-resistant oleophobic coating
