Overview

Apple iPad Pro (10.5 inch Multi-Touch) Tablet PC 512GB WiFi + Cellular Bluetooth Camera Retina Display
iOS10 (Space Grey) APP34242

No matter the task, the new iPad Pro is up to it - and then some.

It offers far more power than most PC laptops, yet is delightfully simple to use.

The redesigned Retina display is as stunning to look at as it is to touch.

And it all comes together with iOS, the world's most advanced mobile operating system.

iPad Pro.

Everything you want modern computing to be.

Now even, well, better.

iPad has always offered the ultimate Multi-Touch experience.

The redesigned Retina display on iPad Pro sets a whole new standard.

It's not just brighter and less reflective, it's far more responsive than anything that's come before.

Whether you're scrolling through pages in Safari or playing an intense 3D game, everything feels utterly smooth, fast, and immersive.

The new 10.5-inch iPad Pro comes with a screen nearly 20 percent larger than the 9.7-inch model, so you get more room to do more.

It also delivers a full-size onscreen keyboard.

Yet it's just as portable as ever.

The new iPad Pro Retina display now supports a 120Hz refresh rate.

So movies and videos look spectacular, while games play smoothly without distracting artifacts.

Fast, it turns out, is incredibly beautiful.

And however you use the display - with your finger or Apple Pencil - everything will feel more responsive.

Doing more than ever will soon be easier than ever.

In iOS, an all-new Dock makes it simple to open recently used apps and files.

And when you use Slide Over or Split View, both apps will stay active so you can work with them simultaneously.

So edit an image in Adobe Photoshop Fix while creating a web page.

Or use Safari to plan your next vacation while confirming dates in Calendar.

- 512GB flash storage
- 10.5-inch (diagonal) LED-backlit Multi-Touch display
- 2224 x 1668 resolution at 264 pixels per inch (ppi)
- Fingerprint-resistant oleophobic coating
