Overview

Freecom 2.5/3.5 inch USB 3.0 Hard Drive Docking Station VM56137

Have an older hard drive laying around after a system upgrade? Are you a system administrator who needs to install multiple hard drives? Looking for a good solution to easily connect and use your internal hard drive? Look no further - this is the Freecom Hard Drive Dock 3.0, a docking station that turns any internal 2.5' and 3.5' SATA hard drive into an external drive.

Simply click your internal hard drive in the dock, and it instantly becomes available to you, it will show up as an external USB 3.0 device.

No easier way to install and use an internal drive - ideal for temporary use of your (old) internal hard drive.

An intelligent and convenient storage solution - by Freecom.

The Freecom Hard Drive Dock 3.0 is the easiest and fastest way to use your internal 2.5' or 3.5' SATA hard drive as an external one.

Simply click your internal drive in the dock, and have instant access to the data on the drive.

No hassle, no screws needed, no software installation - does it get any easier than this? Simply plug the dock into your computer and insert your hard disk to turn it from an internal disk to an external one.

If you want to use multiple hard disks with one dock, simply press the release button and replace the hard drive with another one.

The Dock 3.0 also comes in handy when you are installing new PC's - using and swapping hard disks has never been easier.

The Freecom Hard Drive Dock 3.0 is small and convenient to store and is designed to last a lifetime.

It has a super fast USB 3.0 / USB 2.0 connection, so you can use it with both PCs and Macs.

Keep it close - before you know it, you won't be able to get by without it!

- USB 3.0 Interface, Providing Fast Data Transfer Speeds
- No cooling fan ensures quiet operation
- Make a Backup of Important Documents and Files
- 5000 Mbit/s MAX (USB 3.0)
- 480 Mbit/s MAX (USB 2.0)
