Overview

Safexs Protector 3.0 (8GB) USB Flash Drive

Safexs Protector 3.0 has been designed and developed within the EU specifically for government agencies to help reduce costs whilst still maintaining high security requirements.

All Safexs Protector 3.0 drives are packed in bulk packaging which reduces empty space and removes unwanted avoidable packaging, helping to save the environment.

This secure memory stick is loaded with security features to protect against unauthorised access and Malware attacks, Safexs Protector 3.0 is the first drive to have the new Password Rescue functionality built-in, allowing users to securely access the device in case of a lost password without the risk of losing data.

Safexs Protector 3.0 has TRUE cross platform support and operates on Windows, Mac and Linux based machines at ease.

The small form factor, ease of use, and fast USB 3.0 speeds, makes Safexs Protector 3.0 the perfect choice for government agencies that are looking to protect their sensitive information.

- AES 256 bit in XTS-Mode
- Auto-destruct
- Brute-force protection
- Tamperproof
- Cross platform support
