Overview

3M GPF19.0 Frameless 5:4 Gold Privacy Screen Filter for 19.0 inch (5:4) LCD Monitors - 98044055022 3M79730

Did you know there is a 4 in 5 chance that someone, somewhere, will have been trying to snatch a glance at your laptop, phone or PC today.

Thankfully, 3M has a fast, affordable solution that will help protect your data instantly, whichever electronic devices you're using.

Fit a 3M Privacy Filter, problem solved.

Simple.

3M Privacy Filters block out the view from either side of your screen without blurring or distortion, enabling you to safely continue viewing confidential data and personal files in public - all everyone else will see is a black screen (or, with our new gold filters, their own golden reflection!).

Our filters range from removable protective films for mobile phones and PDAs, to a flexible, hard-wearing film that fits easily over the screens of PCs, laptops and netbooks.

When originally launched, 3M blackout privacy filters set a new standard for on-screen data protection.

But now, our new Gold Privacy Filters provide twice the level of effective privacy protection and a further 14% of clarity.

You see more clearly than ever, while on-lookers see nothing but a vibrant reflective golden screen.

- Greater on-screen security than ever!
- Privacy not only works from the sides, but also from above
- Narrower visible viewing angles
- Sharper, more immediate viewing 'cut-off', provides nearly twice the effective privacy of standard 3M

'black' filters

- Mirror-like reflective effect provides an obvious privacy warning to onlookers
- Enhanced on-screen clarity for users - 14% higher viewing clarity than 3M black filters
- Unique micro-louvre black out privacy technology from 3M
- Easily removable to allow for screen sharing when privacy not required
- Screen size (diagonal): 48.3 cm
- Resolution 1280 x 1024
- Aspect Ratio 5:4
