Overview

Bean To Cup Coffee Machine PIK05489

This very modern and stylish Igenix Brushed Stainless Steel Digital Bean to Cup Filter Coffee Maker is the perfect appliance to help you kickstart your day.

It grinds fresh coffee beans for a quality cup of coffee every time, producing between 2 to 12 cups (1.5L).

The built-in burr grinder allows you to choose what strength of coffee you prefer-from weak to strong-it's your choice.

Or if you're too busy for the full process, simply use filter coffee instead for the same great taste.

It's convenient and easy-to-use with its digital controls and 24 hour programmable timer, so perfect for a freshly brewed coffee first thing in the morning or an extra pick me up during the afternoon.

This Coffee Maker uses a glass coffee jar and features a Keep Warm function so your coffee will remain at the correct temperature for up to 40 minutes, meaning you can come back for as many refills as you require.

After this time the coffee maker will automatically turn off to save energy.
