Overview

UniBond Humidity Absorber Small Device (White)

A typical family produces on average 12 litres of water a day through household activities like cooking, taking a shower or bath, washing and even turning the central heating on.

By absorbing excess moisture from the air, UniBond moisture absorbers protects your property from damage and improves your comfort.

In addition it helps prevent the development of mould and dust mites, which could cause allergies.

- 2 in 1 technology- absorbs humidity and neutralises odours
- Helps combat condensation, damp rooms, allergens in the air, mould and mildew
- Ideal for the small/ home office
- Suitable for rooms of up to 10m²
- Includes anti-spill technology to avoid leaks and spills
- Includes 1 x 300g Power Tab
- Ideal for rooms that are up to 10m²
