Overview

Safescan 70 Counterfeit Detector UV Checker with White Light Area

The Safescan 70 Black offers a complete solution for quickly authenticating banknotes, credit cards, passports and other ID documents.

Its compact size fits perfectly into any point-of-sale location.

Safescan 70 Black features a powerful UV lamp and reflector to verify the critical features in banknotes (all currencies), passports, ID cards, credit cards and all other official documents.

The large white LED light area gives you a clear view of the watermarks, microprint and metallic thread possessed by banknotes instantly.

The Safescan 70 comes complete with an automatic on/off switch sensor to save energy and improve lamp life which makes it an ideal choice for any business or retail setting.

Available in 2 colours to match your point-of-sale environment.
