### Overview

---

HP 81 Light Cyan Ink Cartridge (680ml) for the 5000 and 5000PS

HP 81 Dye Ink Cartridges are designed to work with HP 81 Dye Printheads as part of a complete modular ink system.

Six specially formulated, dye-based ink colours deliver the smoothest Colour transitions and wide Colour gamuts.

These high-capacity 680ml ink cartridges are ideal for overnight or unattended production printing.

Built-in smart chips constantly monitor ink cartridge levels and alert you when it's time to replace.

- Fast, unattended printing without compromising print quality. Ink levels are continuously monitored so users always know how much ink is in each cartridge.
- Maximum quality print modes, up to 1200 dpi, help bring high resolution images to production printing.
- Ink cartridge warranty valid until the "end of warranty" date printed on the cartridge is reached, or all genuine HP ink is depleted, whichever occurs first.
- Printhead warranty valid until the "end of warranty" date printed on the printhead is reached, or 700 cc of ink is cycled through the printhead, whichever occurs first.
