Overview

Verbatim MediaShare Mini VM49160

Portable wireless streaming device for use with your tablet or smart phone.

STORE, STREAM & SHARE...Anywhere! When a micro SD card (not included) is inserted the Verbatim MediaShare Wireless Mini becomes a wireless USB drive.

Creates a wireless connection to the contents of the micro SD card allowing you to access from your iOS or Android tablet/smart phone.

- Connect up to 5 devices simultaneously to the MediaShare to share video, music, photos and data
- Upload and download content to and from your device
- Easily back up files on your phone or tablet
- MediaShare will act as a bridge to the WAN/Internet so you can play content from the internet whilst another device streams content from the MediaShare
- Up to 3 hours of continuous use
- Charges via USB, battery can be charged while in use
