Overview

Canon PIXMA PRO-10S (A3+) Colour Inkjet Professional Photo Printer (Black)

PIXMA PRO-10S's 10-ink pigment based system produces accurate, stable and long lasting, gallery-quality prints.

Three dedicated monochrome inks also ensure your black and white prints are beautifully reproduced.

PIXMA PRO-10S uses LUCIA inks which combines the glossiness and vivid colours of dye-based ink with the longevity of pigment ink.

Chroma Optimizer ink enhances glossiness, flattens the print surface and expands colour range.

Use the Pro Gallery Print app for the iPad to work seamlessly with professional cloud-based photography services such as Zenfolio and SmugMug.

Print photos directly from your preferred cloud storage services including Facebook, Dropbox, Google Drive and OneDrive using PIXMA Cloud Link.

Print directly and easily from your tablet or smartphone using the Canon PRINT app.

An Ethernet connection makes it simple to integrate the PIXMA PRO-10S into your workflow.

Take the hassle out of finding the correct print settings by using Canon's Print Studio Pro plugin, which is compatible with Adobe Photoshop and Lightroom - so you can print straight from your professional editing software.

Compatible with a choice of professional quality printer paper from Canon, plus specialist papers from manufacturers such as Hahnemühle and Canson.

Print labels directly onto compatible CDs using Direct Disc Print to create a professional look for your media.

- 10-ink pigment based system for professional quality prints
- Print directly from cloud based photo and storage services
- Wireless printing from your PC, tablet and smartphone
- Easy integration with professional editing software
- Wide range of Canon and other specialist papers supported
