### Overview

---

Optoma ML750ST Short Throw LED DLP Projector 20000:1 800 Lumens 1280x800 (0.42kg) OP62996

The ML750ST builds upon the popular ML750e LED projector but has been engineered with a short throw lens to make it even more flexible for meetings, presentations or movies on-the-go.

This tiny projector weighs just 420g and comes with a convenient carry bag.

Give laptop free presentations using the built-in media player, native office viewer, microSD card slot and USB connection or present wirelessly from a mobile device using the free HD Cast Pro app and optional wireless USB adapter.

You can even use the ML750ST for digital signage applications as the projector can be mounted in virtually any orientation.

LED technology provides accurate colour reproduction (Rec709), long life and support for portrait mode.

The compact ML750ST is ideal for watching HD movies directly from a microSD card, USB stick or using the built-in memory.

HDMI input enables connection to the latest laptops, PCs, games consoles or Blu-ray players and Mobile High-Definition Link (MHL) technology allows users to display content directly from an MHL-enabled mobile device.

And with a low 17ms input lag and quick response time, this entertainment projector gives gamers a competitive advantage.

- HD Ready and LED technology - amazing colour reproduction and long-life
- Great connectivity - MHL, HDMI and optional wireless
- PC free viewing - native office viewer, built-in memory, microSD card slot and USB
- Short throw lens, ultra compact and lightweight - only 420g
