Video Playback Performance : 13 Hours

Pack Quantity 1
Price : £385.72

Overview

Apple iPhone SE (4 inch Multi-Touch) 32GB WLAN WWAN Bluetooth Camera Fingerprint-Sensor iOS9
(Space Grey) APP29214

Welcome to iPhone SE, the most powerful 4-inch phone ever.

To create it, we started with a beloved design, then reinvented it from the inside out.

The A9 is the same advanced chip used in iPhone 6s.

The 12MP camera captures incredible photos and 4K videos.

And Live Photos bring your images to life.

The result is an iPhone that looks small.

But lives large.

iPhone SE takes an incredibly popular design and refines it even further.

Crafted from bead-blasted aluminium for a satin-like finish, this light and compact phone is designed to fit comfortably in your hand.

A brilliant 4-inch Retina display makes everything look vibrant and sharp.

And matte-chamfered edges and a colour-matched stainless steel logo finish the look.

At the core of iPhone SE is the A9, the same advanced chip that's in iPhone 6s.

With 64-bit desktop-class architecture, the A9 chip brings you spectacular speed and responsiveness.

And with console-class graphics performance, your favourite games and apps are incredibly rich and immersive.

Making it a mighty chip for maximum performance.

Embedded directly into the A9 chip, the M9 motion coprocessor connects to the accelerometer, compass, and gyroscope for a range of fitness tracking capabilities, such as measuring your steps and distance.

It also makes it easy to activate Siri by simply saying 'Hey Siri,' without having to pick up your iPhone.

With a 12MP iSight camera, you can be sure to capture sharp, detailed stills like the ones shot on iPhone 6s.

That includes shooting - and even editing - brilliant 4K video, which is up to four times the resolution of 1080p HD video.

The Retina display isn't just a place to see your content - it's a flash for your FaceTime HD camera.

Powered by a custom display chip that allows the display to flash three times brighter than usual, the Retina Flash helps illuminate your selfies in low light and at night.

- Apple iPhone SE
- Capacity: 32GB flash drive
- 4-inch (diagonal) LED-backlit widescreen Multi-Touch Retina Display
- 12 Megapixel iSight camera and 1.2 Megapixel FaceTime HD Camera
- Touch ID: Fingerprint sensor built into the Home button
- A9 chip with 64-bit architecture and embedded M9 motion coprocessor
- 802.11a/b/g/n/ac Wi-Fi and Bluetooth 4.2 wireless technology
- iOS 9 advanced mobile operating system
- FaceTime video calling over Wi-Fi or cellular
- Nano-SIM (iPhone SE is not compatible with existing micro-SIM cards)
