Product Type : USB Adaptor
Model Name : DA80
Form Factor : USB Adaptor

Pack Quantity 1
Price : £46.56

Overview

Plantronics DA80 USB Audio Processor for Plantronics Headsets PLR04447

The Plantronics DA80 is a high-performance USB audio processor for analogue headsets with high quality audio, and one-touch call, mute and volume control.

Plantronics software takes the DA80 one step further by revealing insights which can be used to enable more effective operations, it can detect when the headset is disconnected and will automatically activate screen locking for security compliance, it can report on call events, and more.

- Modern and sophisticated styling conveys quality and confidence
- Easy, at-your-fingertips interface enables representatives to bypass on-screen call control menus for better focus on callers
- Quick Disconnect (QD) feature provides walk away convenience and compatibility with all Plantronics QD-equipped headsets
- Superior noise and echo cancellation for richer, clearer conversations
- Acoustic exposure algorithms helps you meet Noise at Work regulations
- Free, open APIs to add intelligence or inform work flows and business processes by building a contextual bridge across customer care ecosystem
- Downloadable firmware updates and unique serial numbers creating consistent management of devices across your centre
- Backed by industry-leading Plantronics global service and support and a full two-year limited warranty
