Overview

BT 4000 Cordless Telephone Big Button DECT Handsfree Silver/Black (Single)

The BT4000 Big Button has large buttons making it not only practical for elderly customers but also an aid to sight, hearing and dexterity impaired customers.

Fed up with sales calls interrupting you at home? The new BT4000 Big Button brings you unique functionality to block nuisance or unwanted calls.

Its call management feature puts you back in control, by enabling you to choose the calls you want to take and those you want to block.

Designed in the UK, the BT4000 Big Button offers you a large easy to read display, great sound quality and tons of simple to use features.

With the BT4000 Big Button you can choose the type of calls you want to block.

For example international and withheld numbers can be blocked, which account for a large proportion of unwanted sales calls.

Alternatively if there are specific numbers you want to block, you can block up to 10 numbers from getting through.

The BT4000 Big Button is the perfect phone for an elderly customer or sight, hearing or dexterity impaired.

The large buttons make dialling easy and accurate and the 1.8' full graphic display ensures clarity when reading the screen.

The BT4000 Big Button is hearing aid compatible, thanks to the built-in inductive coupler.

This allows you to clearly and comfortably hear telephone conversations through your hearing aid.

The modern stylish design makes this phone a great addition to any room, whilst only taking up minimal space.

1.8 inch full-graphical display provides a more quality look and feel.

The excellent blue backlight makes it clear and easy to read.

Long range of up to 300m lets you walk in and outside the house with freedom and without interrupting your call.

Talk hands-free - bringing the callers voice into the room and letting you get on with things while you chat.

Talk time of up to 15 hours and standby time of up to 160 hours.

Great for those long conversations.
