### Overview

---

Loctite Perfect Pen (3g) Super Glue Gel Pen

Loctite Super Glue Gels are fast acting cyanocrylates adhesives (super glues) which quickly form strong bonds to virtually all materials.

Loctite Super Glue Gels are great for use on absorbent surfaces because the gel formula rests on top of the material rather than being absorbed into the material.

This encourages greater adhesion as gels can also bridge small gaps in roughly broken materials.

Loctite Super Glue Gel formulas are especially useful when working on non-horizontal surface, because Gels don't drip or run.

Use Loctite Super Glue Gel formulas when bonding vertical surfaces, overheard, or those at a marked slant.

- Weight: 3g
- Clean
- Precise
- Easy to use
